

Best in Class TPD Services

Proven synthetic experiences:

- > **80,000** compounds synthesized
- > **1,000** chemists with experiences accumulated since 2016
- > **100** clients/collaborations
- > **200** linkers and E3 ligase ligands in stock
- > **1,000** diverse linkers successfully synthesized
- > **100** novel E3 ligase ligands achieved
- > From mg to several kg customized delivery

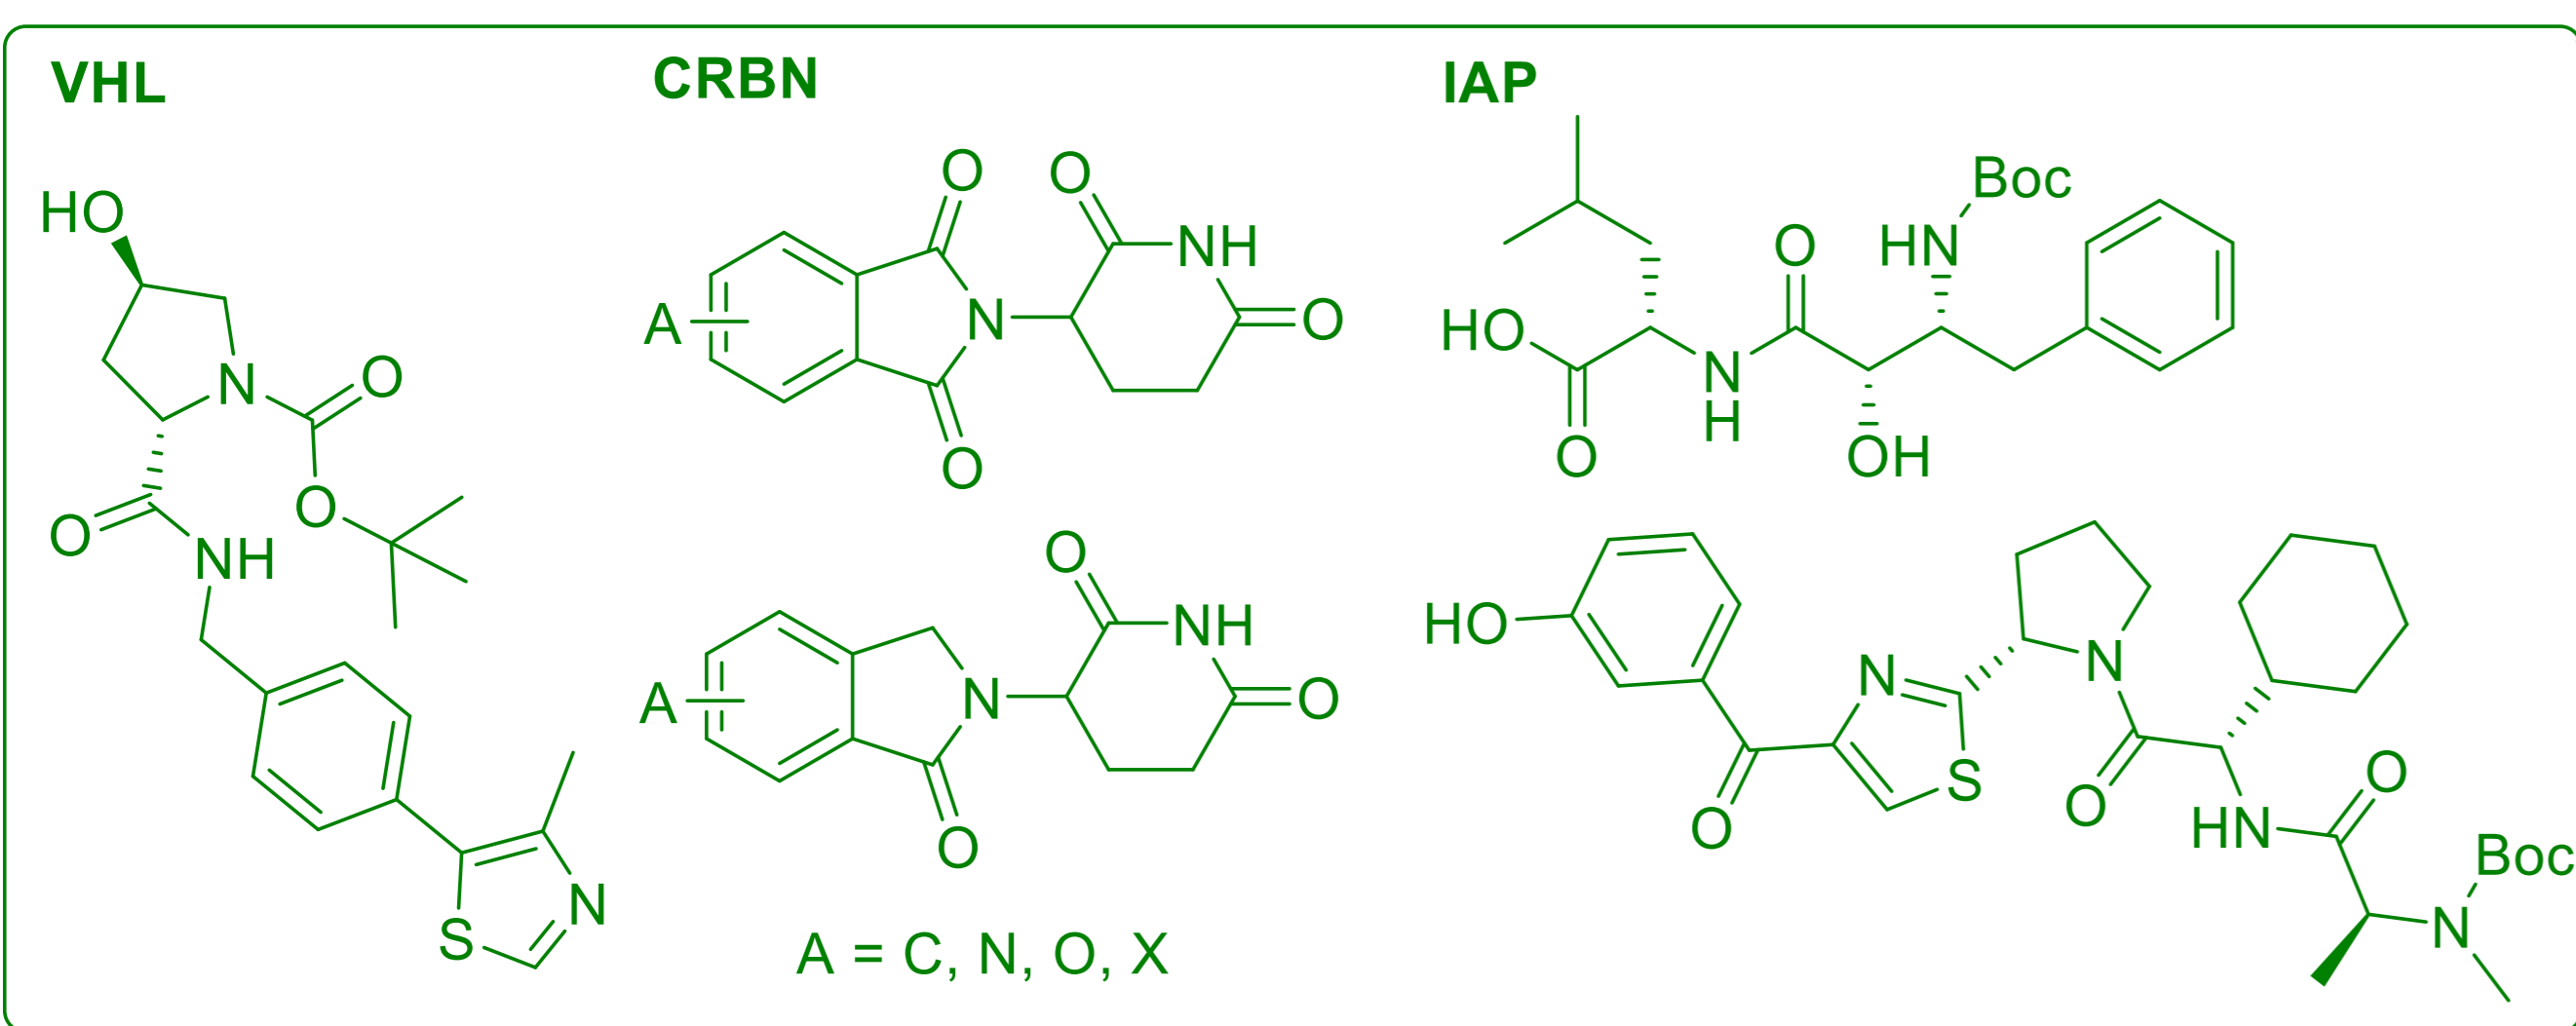

Leading analytical capabilities:

- > **200** methods of prep-HPLC and chiral-SFC
- > Diversified techniques (RP-HPLC; NP-HPLC; SFC)
- > Various columns and modifiers available
- > Innovative online dilution system designed for PROTACs
- > Native-MS analysis for ternary complex confirmation
- > Proteomics studies to identify off-target effect
- > Unique DMPK evaluation system

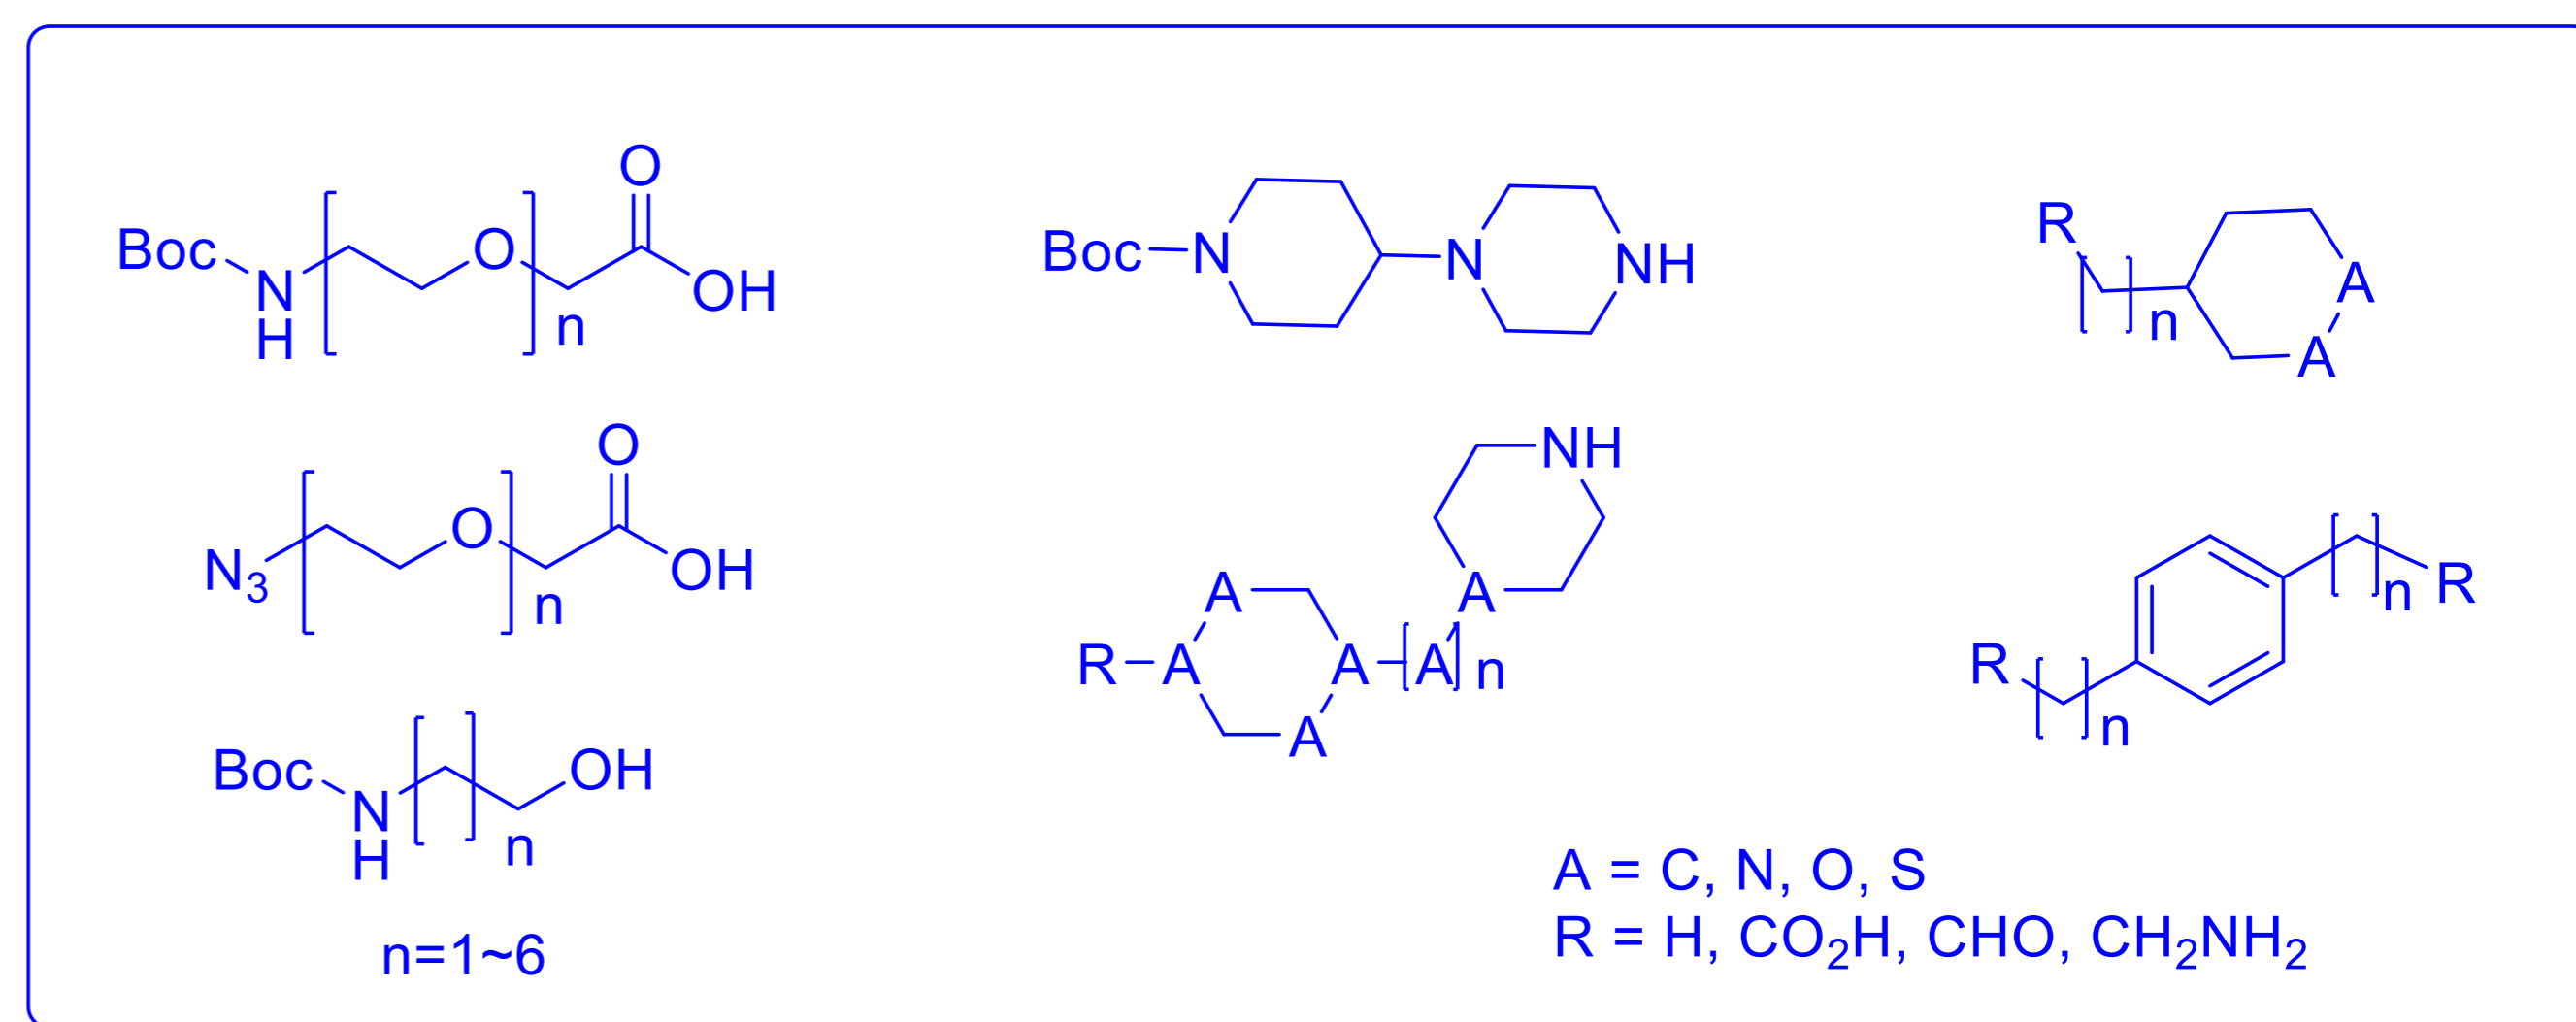

Well-established modular system:

E3 ligase ligands: Common ligands are readily available, e.g. VHL, CRBN, etc.

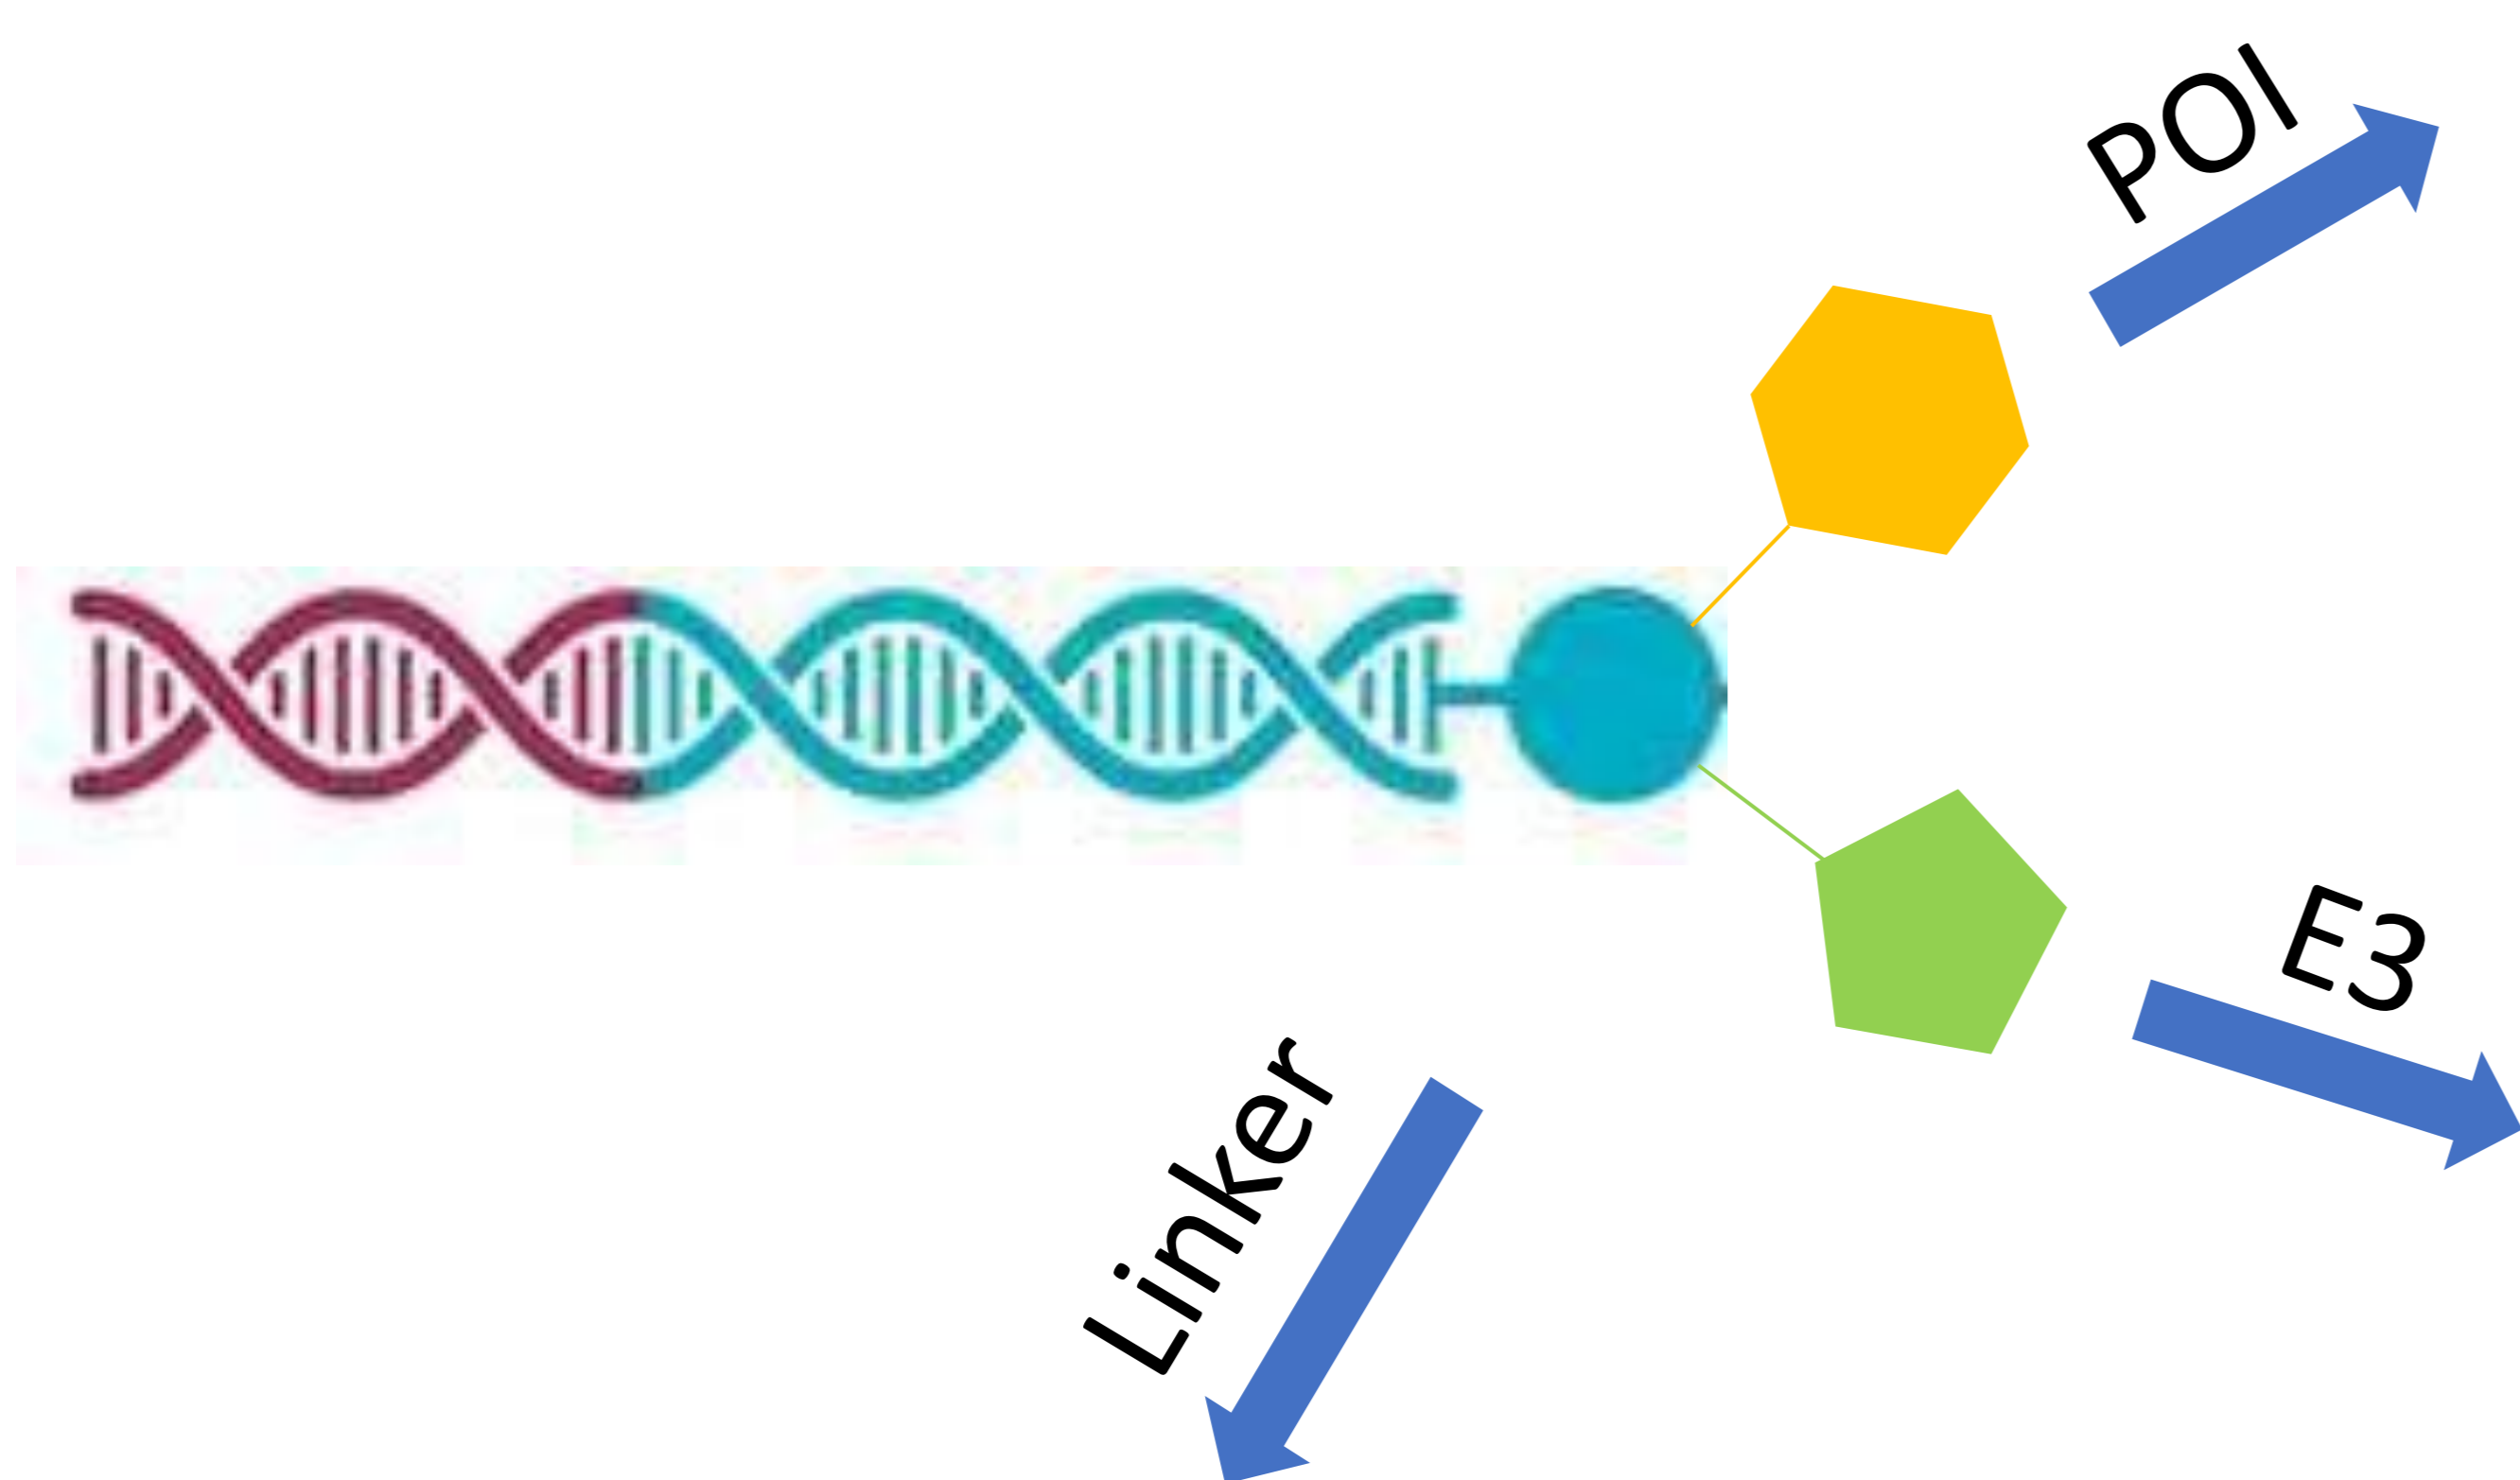

Linkers: Most frequently used linkers, e.g. PEG, alkyl, "clickable", rigid, etc.

PROTAC : Proteolysis Targeting Chimeras

PROTAC DEL system:

- Diversity of **3.2 billion**
- **8000+ BBs** and different DNA compatible reaction
- Flexible handle **allowing conjugation of E3 ligand**
- **Novel Ligand** expected to be revealed through DEL

- **Both linear and rigid linker collection**
- **Theoretical linker optimization** in one selection
